Global High Yield

Overall Morningstar Rating™

Morningstar Ratings 29/02/2016

3-year Morningstar Rating™

5-year Morningstar Rating™

Investment Policy

The fund primarily invests in a diversified portfolio of worldwide corporate bonds with a higher risk and therefore with a higher interest rate (so called high yield bonds, with a quality rating lower than BBB). Measured over a period of several years we aim to beat the performance of the benchmark 70% Barclays Capital US High Yield, 30% Barclays Capital Pan-European High Yield, 2% issuers capped ex Financial subord. We combine our analysis on specific issuers of corporate bonds with a broader market analysis to construct the optimal portfolio. We aim to exploit differences in returns of these issuers within sectors and differences in returns between regions, sectors and different quality segments (ratings). The differences in high yield returns within a sector can be significant; we therefore believe that a strong focus on issuer selection and issuer diversification needs to be a crucial part of the high yield investment process. You can sell your participation in this fund on each (working) day on which the value of the units is calculated, which for this fund occurs daily. The fund does not aim to provide you with a dividend. It will reinvest all earnings.

Performance NET

+ Performance prior to the launch date of this fund reflects the performance of another, comparable fund, that was merged with this fund upon its launch.

Cumulative Performance (NET %)

Risk Profile

Historical data, such as is used for calculating this indicator, may not be a reliable indication of the future risk profile of this fund. There is no guarantee that the risk indicator will remain unchanged, it may shift over time. The lowest category of risk does not mean that the investment is risk-free.

This fund is in category 5 because of the behaviour of the product during the measuring period. The overall market risk, taking into account past performances and future potential evolution of the markets, associated with bonds used to reach the investment objective is considered high.

These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is high. The fund's liquidity risk is set to high. Liquidity risks arise when a specific underlying investment is difficult to sell, causing possible difficulty to redeem your investment from the fund. Moreover, currency fluctuation may impact highly the fund's performance. Investments in a specific theme (like the one described in this fund's Objectives and Investment Policy) are more concentrated than investments in various themes. No guarantee is provided as to the recovery of your initial investment.

VaR (95% annualized)

VaR (without diversification)

The VaR (Value at Risk) is a statistical indicator measuring the maximum annual loss that can be incurred within a certain confidence interval.

Legal Disclaimer

This is a promotional document and as such the views contained herein are not to be taken as an offer, advice or recommendation to buy or sell any investment or interest thereto. The information in this material can neither be considered as a fiscal or legal advice. Reliance upon information in this material is at the sole risk and discretion of the reader.

The Luxembourg funds mentioned in this document are subfunds of SICAV's, established in Luxembourg. These SICAV's are duly authorized by the Commission de Surveillance du Secteur Financier (CSSF) in Luxembourg. Both sub fund and SICAV are registered with the CSSF. All performance values that are not given in the fund currency have been calculated by conversion. The performance is calculated on the basis of the net asset value per unit: NAV-NAV (excluding any initial charge; distributions reinvested), with income reinvested. Where a Fund invests overseas, its value may fluctuate due to currency exchange rates. The Ongoing Charges are the sum of all commissions and costs charged on an ongoing basis to the average fund assets (operating expenses). The value is expressed as a percentage of the fund's assets. Unless otherwise stated, all data is unaudited.

Investment sustains risk which may include the risk of capital loss. Please note that the performance quoted above is historical and the value of your investment may rise or fall and also that past performance is no guarantee of current or future performance. The past performance is not indicative of future results and shall in no event be deemed as such. Price of Units and any income from them may fall as well as rise and is not guaranteed. Investors may not get back the amount originally invested. Foreign exchange volatility constitutes an additional exchange rate risk. Investors should not base investment decisions on this document. Read the prospectus before investing. The value of your investments depends in part upon developments on the financial markets. In addition, each fund has its own specific risks. See the prospectus for fund-specific costs and risks. For more detailed information about the investment fund, its costs and risks, please refer to the prospectus, Key Investor Information Document (KIID) and the corresponding supplements. These documents together with the annual report and the articles of incorporation for the Luxembourg domiciled product(s) are available on www.nnip.com. And free of charge upon request by (e-)mail to: info@nnip.com or Schenkade 65, P.O. Box 90470; 2509 LL The Hague, Netherlands.
